<https://unix.stackexchange.com/questions/40242/scroll-inside-screen-or-pause-output>

~/.screenrc

i slightly modified - based on <https://linuxize.com/post/how-to-use-linux-screen/>

```
# Turn off the welcome message
# startup_message off

# Disable visual bell
vbell off

# Set scrollback buffer to 10000
defscrollback 10000

# Customize the status line
hardstatus alwayslastline
hardstatus string '%{= kG}[ %{G}%H %{g}][%S][%= %{= kw}%?%-
Lw%?%{r}(%{W}%n*f%t%?(%u)%?%{r})%{w}%?%+Lw%?%?%= %{g}][%{B} %Y-%m-%d %{W}%c
%{g}]'
```

```
# Enable mouse scrolling and scroll bar history scrolling
# Ctrl-A Esc (Ctrl-B / Ctrl-B / Up / Down)* .. Esc or Enter
termcapinfo xterm* ti@:te@
```
